1. The FBID East Coast monitoring station located at []
[] is believed to be no longer suitable as an FBID Headquarters
emergency relocation center, since it would probably be immediately
untenable in the event of an atomic attack on Washington.

2. The referenced memorandum, copy attached, requested more
appropriate relocation space for FBID at []
That request has remained unfulfilled due to lack of suitable space.
However, we are now advised that space will soon be made available in
buildings now being used for []

3. It is therefore requested that approximately 650 square feet
of space in building No. 12, and approximately 400 square feet of
space in building No. 4, at [] be allocated for FBID use
as an emergency relocation headquarters.

4. This request has been informally coordinated with the
Director of Communications who is submitting a separate request for
O/C space in these buildings. Rehabilitation costs would be shared
proportionally between O/C and CO.
